DETAILED ACTION

1. Applicant's election with traverse of species 1, Figs. 1, 2a-2b, claims 1-6 in the reply filed on 6/1/06 is acknowledged.

2. Claims 1-6 are objected to because of the following examples of the terms or features that are confusing and unclear: Claims 1-6, the terms "characterized in that" are unclear; claim 1, line 2, the term "introduction opening" and line 6, the features "introduced into the introduction opening" are confusing, last line, "its final position" lacks an antecedent basis; claim 2, line 2, "proceeding backward ... back end" are confusing and unclear, line 3, "the lever" lacks an antecedent basis; claims 3 and 4 features are not understood; claim 5, line 2, "their legs" lacks an antecedent basis, lines 3-4, it is unclear how the legs could press onto the flex cable by two ramps on the slide; claim 6, line 2, "their ends" lacks an antecedent basis.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Mosquera (4975076).

Insofar as the claims can be understood, Mosquera, Figs. 1-5 show a housing 14, at least one opening 16, a flat flex cable 32, a strain relief having a slide 12, a rib 26, and a recess 60.

Art Unit: 2833

As to claim 2, Mosquera shows the slide having a tip, a ramp with a back end (not labeled) and the rib is pressed into the recess.

As to claim 3, Mosquera shows an upper edge disposed a shoulder for the ramp (not labeled).

As to claim 4, Mosquera shows spring contacts 36 having head ends press on regions of the conductive tracks of the flex cable.

As to claim 5, Mosquera shows the spring contacts being essentially U-shape having legs (not labeled).

As to claim 6, Mosquera shows the spring contacts having female connectors at one end.

6. Chishima et al, Geltsch et al, Miura et al, Godefroy et al, Puerner, Johnson, and Ikemoto are cited for disclosure off flexible cable connectors.
